## RESEARCH EXPERIENCE

**MLCS lab, Yonsei**

Jul.2022 - Present

Advised by Prof. Jongeun Choi

*Undergraduate Research Intern*

- Real-world Diffusion-EDF pick experiment using Franka Emika Panda showcased live.
  - Designed the end-to-end pick and place experiment code, engineered with ROS, C++, and Python for Franka Emika Panda, achieving a 85% success rate.
  - Applied RTAB-Map and point cloud reconstruction techniques for visual point cloud data.
  - Led a team of 4 interns during the project.

- Reinforcement Learning (RL) project using Mujoco for custom mobile manipulation.
  - Engineered an interface with Gym, Mujoco, and customized URDF files for our custom robot.
  - Implemented Soft Actor-Critic (SAC) algorithm enabling the robot to move and pick the object with high manipulability.
